**From:** Mark T. Lundahl – Road Commissioner

**RE:** Annual Township Meeting

**Date:** 3/8/22

---

**General:**

Road Commissioner will ask the board to approve \$100,000 from the General Fund be transferred to Road and Bridge Department for 2022 projects.

2022 will be a year for many sections of road identified within approximately a 1-mile stretch that we need to take preventative measures and immediate measures to ensure the quality and upkeep of the roads and water ways. Improvements will be in the areas of redirecting water, replacing culverts, expanding/dredging ditches, resetting grades, resurfacing sections of uneven road where water pools, and the re-building or re-rocking of shoulders.

One culvert in particular needs to be addressed in the short-term at the intersection of 14<sup>th</sup> Street and 43<sup>rd</sup> Avenue. This area is backing up due to a suspected crushed culvert beneath the road. There are several other ditches that will need to be dredged, as mentioned, to ensure proper water flow and avoid stagnant water (safety).

Utilizing professional construction companies will be essential to ensuring that several blocks if not miles of waterways can flow properly. Road and Bridge will be working throughout the season with township employees and excavation and construction companies to address all of these areas of improvement.
